

SIZE GUIDE

To use this Size Guide, please print this page onto an A4 sheet of paper. Ensure that the **'Scale%'** selection of the print is set at **'Uniform'** or **'100%'**.

On the printout, measure the red line below using the metric side of the ruler. The line must measure exactly **10 centimeters**.

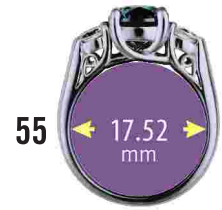

Select a ring of your own which fits the intended finger.

Before you begin, determine the narrowest diameter of your ring, as some ring bands may have rounded edges.

Place the ring over one of these circles matching the inside diameter of your ring band. The arrow heads will help you to spot the edge of the circle.

If your ring appears to fall between two sizes, choose the larger size.

Please quote the size number and dimension stated on the circle, when placing your request.

55 ← 17.52 mm →

View the ring and circle from directly overhead. When the arrowheads are touching the inside of the ring band, that will be the size.

SIZE 44	← 14.01 mm →	45	← 14.33 mm →	46	← 14.65 mm →	47	← 14.97 mm →
48	← 15.29 mm →	49	← 15.61 mm →	50	← 15.92 mm →	51	← 16.24 mm →
